

## **Efficient mechanical growthstop in potatoes with *Crown Crusher***

Innovative Danish solution  
for mechanical growthstop  
in potatoes.

Good test results in 2019  
and 2020.

Available in 2- and 4-row  
machines and as a  
combined machine with  
*Opti Weeder*, i.e. mechanical  
weeding and growthstop in  
one machine.

### Advantages of **CROWN CRUSHER:**

- Efficiently crushing the core of the potato plant and thus preventing re-growth. Generally very low re-growth.
- High capacity
- Only one passing needed (no prior topping necessary)
- The crushed tops of the potato plant may be placed on top of the ridge or between ridges
- Relatively low energy consumption
- Easy adjusting and maintenance
- Ergonomic
- Late weeding with mechanical weeder *Opti Weeder* recommended.
