

OPTI WEEDER - accurate and efficient mechanical weeding of potatoes - with big capacity

Innovative Danish solution for mechanical weeding of crops growing on ridges (potatoes). Available width: 2/4/6/8 rows. Easy and flexible adjustment. Simultaneous weeding of more establishment sets. May be combined with *Crown Crusher* - mechanical growthstop in potatoes.

*Advantages of **OPTI WEEDER:***

- Swift weeding, 10-25 km per hour
- Gentle towards the crop, no root damages
- Accurate weeding until 1 cm from the crop. Weeding between plants, on side slopes and in curves. Also weeding before germination.
- Flexibility in row width and extra functions
- 6- and 8 rows machines available with fixed or variable frame
- 6-rows machine with variable frame weeds establishment sets of 2+2+2
- 8-rows machine with variable frame weeds establishment sets of 2+4+2
- Ergonomic. Easy adjustment and maintenance.
